

LUDIVINE CHRIS EURANIE

Earth Observation · Systems Engineering · Programme Management · Dual-Use Space

☎ +33 685961685 ✉ LCEuranie@outlook.com 📍 Strasbourg, FR 🌐 www.linkedin.com/in/lceuranie 🚀 lceuranie.github.io

PROFILE

Earth Observation and project management professional transitioning into the European space sector via the ISU Master of Space Studies. 10+ years delivering complex multi-stakeholder technical projects in industry, with hands-on training in mission design, MBSE, EO analytics, and ECSS governance. ESA internship Aug26–Jan27. Concurrently co-founding Aletheia (French SAS, in incorporation) – EO decision intelligence with agentic AI for verification.

EDUCATION

Master of Space Studies - Engineering and Applications

Sep-25 to Jun-26 · Strasbourg, FR

International Space University – CNES Scholarship

EARTH OBSERVATION (EO), GIS & AI ANALYTICS

- Drone Photogrammetry · AI-orchestrated build processing 47 DJI Neo frames into a 2 cm/px orthomosaic and 4.5 M-point 3D reconstruction with a live web viewer.
- AI for EO · built a Google Earth Engine workflow for multi-temporal Sentinel-2 vegetation monitoring over Rwanda; CNN-based classification; deployed an interactive change-detection app supporting UN SDGs 2/13/15.
- Climate-Analog Engine · designed and deployed a split-screen GEE application forecasting viticultural climate shifts to 2050 from 14 historical baseline profiles, mapping future premium agricultural regions.
- Astronomical Data Mining · curated open-cluster NGC 4852 from Gaia DR3, building a Color-Magnitude Diagram and isochrone fit on 212 high-quality members from a 10,989-source cone search.

SPACE SYSTEMS ENGINEERING & MISSION DESIGN

- Eyesat-1 1U CubeSat · led full lifecycle from requirements to V&V for a hurricane cloud-morphology imaging payload; closed mass/power/link budgets; designed a 520 km SSO in STK; integrated Arduino OBC + XBee.
- Titan Hybrid Swarm + TitanMBSE · led MBSE, risk, science and ops concept for a 9-agent Titan swarm; delivered 35 traced requirements, four closed budgets, and a proprietary ECSS-aligned MBSE tool (demo on request).
- Ground Station Advanced Studies · configured and operated the ISU ground station end-to-end (IC-910H, TNC, RTL-SDR, UHF/VHF Yagi + rotators); enhanced three software workflows (Flask + ESP32 prototype, C# mission control, GNU Radio SDR); decoded a live AO-73 telemetry pass.
- Robotics Competition - Project Lead · only team in the cohort to deliver two perfect autonomous returns to base; led 7-member SE with WBS/PBS, FMECA, and iterative Python testing via a Robotics Digital Twin.
- Concurrent Engineering Workshop - AOCS lead · designed a 750 ± 50 km Sun-Synchronous orbit closing 100% global ocean coverage for a multi-discipline altimetry mission study; STK Level 1 certified.

SPACE POLICY AND STRATEGIC MANAGEMENT

- Project Roadmap (John Templeton Foundation) - Report Head · led the Report workstream of a 20-person team delivering a 15-year, 91-strategy global communication roadmap for deep space human exploration. **IAC 2026.**
- European Space Defense Administration · designed a federal governance framework and 5-year €15B annual roadmap consolidating fragmented national security assets into a unified European command structure.
- Space-Based Solar Power - individual research report · interdisciplinary analysis of global SBSP roadmaps, identifying how incompatible national success metrics stymie international collaboration for energy security.

MSc Geophysics

Sep-11 to Jun-13 · Paris, FR

Institut de Physique du Globe et des Planètes IPGP

BSc Geosciences

Sep-08 to Jun-11 · Paris, FR

Paris-Sud University

Project Management Certifications

2023 -2024 · London, UK

CAPM (Project Management) · SMC (Scrum Master) · ITIL4 (IT Service Management)

WORK EXPERIENCE

Digital Project Manager

Mar-20 to Jul-24 · Crawley, UK

SLB – Digital and Integration

- Led multidisciplinary engineering teams of 5-10 through low-to-medium complexity geosciences project life cycles (\$50K –\$250K) - equivalent to ESA work-package coordination.
- Directed multi-phase information system digital transformation across Europe, improving data integrity by 50% and optimising downstream workflows.
- Coordinated cross-functional teams (finance, IT, engineering, commercial) to deliver 10+ technical projects; built schedule and KPI dashboards (MS Project, Power BI) ensuring 100% on-time delivery; prepared structured documentation (process maps, risk logs, variance reports) mirroring ESA programme review expectations; executed change-request workflows.
- Developed a risk analytics dashboard across 50+ operations, enhancing accountability; oversaw 10+ audits and documented 50+ lessons learned, close-out, handover, and on-time invoicing

Senior Geophysicist

Mar-13 to Jun-23 · Pau, FR & Bucharest, RO

SLB – Analysis and Interpretation

- Delivered 300+ geophysical studies for exploration, reservoir optimisation, and field development - Vertical Seismic Profile (VSP) - generating \$15K – \$1M revenue per project. Strong experience with pre-processing, calibration, filtering, inversion modelling, and uncertainty analysis.
- Led 100+ projects (\$5K – \$50K) - 1D / 2D / 2.5D / 3D modelling, seismic survey feasibility, and reservoir characterisation studies; led data acquisition (field and remote) and processing on 5+ projects of Hydraulic Fracture Monitoring and Underground Gas Storage monitoring.
- Supported 50+ commercial proposals by translating client objectives into technical requirements; mentored junior staff and produced 20+ publications and technical training sessions.

SELECTED OUTPUTS

- IAC 2026 · A Global Communication Roadmap to Sustain Deep Space Human Exploration Missions; ISU MSS 2026 Roadmap team, 20 authors; Report Head.
- 10 conference papers · borehole geophysics & seismic-while-drilling (EAGE, SEG, OTC); 2018 - 2023.
- Aletheia · co-founding a 3-person French SAS in incorporation; multi-source EO fusion with an agentic LLM reasoning layer for industry compliance verification. Live prototype deployed; design partner in initial engagement.
- TitanMBSE · proprietary browser-based, ECSS-aligned MBSE tool (~7,700 lines); demo on request.
- Live Earth-Engine apps · Rwanda vegetation health (5-year Sentinel-2 monitoring) and Terroir Prediction Engine (climateanalog forecasting to 2050).

SKILLS

- Systems Engineering** · MBSE (Cameo Systems Modeler), ECSS Standards, Requirements Management & V&V, FMEA / FMECA, FTA, Mass / Power / Link Budgets.
- Mission Analysis & Design** · Orbital Mechanics, STK Level 1, CubeSat & drone subsystem architecture, CAD modelling (Fusion360), PCB design (KiCad).
- Earth Observation, GIS & Analytics** · Sentinel & Landsat imagery, Google Earth Engine, CNN-based image classification, ArcGIS / QGIS, cloud-based EO pipelines; Python, MATLAB, Power BI, Dataiku, TIBCO Spotfire.
- Programme & Project Management** · PMI (CAPM), Agile (Scrum Master), Waterfall, ITIL4; work-package coordination, risk analysis & mitigation, schedule / cost tracking (MS Project), multi-stakeholder, change-request workflows.
- Interpersonal** · leadership / followership balance, conflict resolution, intercultural adaptability.
- Languages** · French (native) · English (fluent) · Spanish (A1).
